

REPLICAST: Obliq Recordings (Cryptophonics LP CRY-08) Experimental / Live Electronics / Psychedelic

The Replicast LP 'Obliq Recordings' has finally been turned loose. The custom silkscreened LP on the Cryptophonics imprint is limited to 333 copies, and will sell out as word gets around. Free, high-quality .mp3 downloads are included with purchase of the release.

Replicast is comprised of members of Multicast, the Apples in Stereo, and Seattle saxophonist Zack Shaw. The boys have been working on this album for two years, improvising and fishing for a new sound. Echoplex, pattern and delay guide the boundaries of these melodic explorations. The results are a new genre that falls triangularly in the center of the axis between electronica, free-jazz and psych-folk, all bent to Middle-Eastern modes.
